POWER STATEMENT

Computer Science student specializing in Cloud Technology, with hands-on experience in AI development. Combines analytical problem-solving and practical software development with leadership experience as Regional President of TFISC Semarang. Interested in building data-driven and intelligent solutions across cloud, data, and AI.

EDUCATION

Bachelor of Computer Science (Streaming: Cloud Technology)
GPA: 3.53/4.00 | 2024 - Present
Relevant Coursework: Cloud Computing, Artificial Intelligence, Software Engineering, Database Systems

EXPERIENCE

- Regional President, TFISC Semarang (Feb 2026 - Present)
  - Lead regional operations and coordinate board members and activists in planning and executing organizational initiatives.
  - Oversee program implementation and stakeholder communication to support regional objectives.
- Activist: Publication & Marketing, Himpunan Mahasiswa Teknik Informatika (Feb 2025 - Jan 2026)
  - Developed digital content and campaign concepts to maintain brand consistency and support organizational events.

PROJECTS

Cloud Audit Analytics Platform | Data Analytics & Audit Automation

- Developed a Python-based audit analytics platform to support financial risk identification and automate transaction analysis. Generated 10,000 synthetic financial transactions using Faker and injected simulated anomalies to create a dataset for testing analytical review workflows.

Drowsiness Detection System (SnapDrive) | Computer Vision & Deep Learning

- Developed a real-time driver drowsiness detection system using OpenCV and CNN-LSTM models to identify fatigue-related behaviors. Implemented audio alerts and automated Telegram notifications to warn users when persistent drowsiness indicators were detected.

Coffee Bean Quality Classification Research | AI Researcher & Co-Author

- Co-authored an IEEE-published research paper comparing lightweight CNN architectures for automated coffee bean defect classification. Contributed to dataset preprocessing, research methodology, and comparative analysis to evaluate model performance for automated quality inspection.
- Publication: https://ieeexplore.ieee.org/document/11715400

CERTIFICATIONS

- **Google Cloud Computing Foundations Certificate** – Google Cloud | Jul 2026
- **Professional Certificate Google AI –** Google | Jul 2026
- **Python Programming Completion Certificate –** Samsung Innovation Campus (SIC) | Oct 2025

SKILLS

- Cloud & Infrastructure: GCP, MySQL, PostgreSQL, Docker
- Programming & AI: Python, Java, C, PHP, SQL, JavaScript, TensorFlow, Keras, OpenCV
- Web & Tools: HTML, CSS, Laravel, Next.js, Git, Figma, System Analysis
- Languages: English (Professional), Indonesian (Native)
